Streams

★ Paid Internship & Unpaid Stipend Internship — Both Options Available ★

Paid: Monthly stipend for select streams (4 Weeks & above)

Unpaid: Full training + Certification — Ideal for academic credit & skill development

ACCREDITED & APPROVED BY

01 | About Omega Tech Private Limited

Omega Tech Private Limited is a premier industry-aligned training organization dedicated to transforming the academic potential of students into professional competence. Founded with a mission to bridge the persistent gap between academia and industry, we design and deliver structured internship and skill development programs that are practical, relevant, and results-oriented.

Our programs are curated in collaboration with industry professionals, HR managers, and placement experts to ensure that every student who completes our training emerges as a job-ready, confident, and industry-prepared professional.

Our Core Pillars

■ Industry Exposure	Real-world projects, case studies, and corporate simulations that reflect live business challenges.
■ Practical Learning	Hands-on tools, lab sessions, and domain-specific skill building aligned with current industry standards.
■ Placement Readiness	Resume workshops, mock interviews, aptitude training, and career counselling for every student.
■ Certified Excellence	Nationally recognized and industry-accepted certification programs with digital verification.
■■■ Mentor-Driven Approach	Experienced trainers from top MNCs and domain specialists with 5+ years of hands-on experience.
■ Institutional Partnership	Flexible partnership models including revenue sharing, fixed fee, and annual MOU contracts.

Our Reach

15,000+ Students Trained	50+ Industry Trainers	100+ Hiring Partners	3 Office Locations
-----------------------------	--------------------------	-------------------------	-----------------------

Head Office: Pallikaranai, Chennai, Tamil Nadu. **Branches:** Periyakulam, Theni | Ramanathapuram, Tamil Nadu.

Internship Engagement Options

★ INTERNSHIP ENGAGEMENT OPTIONS ★

Paid Internship — Students receive a monthly stipend for their contribution during the internship period. Available for select streams and program durations (4 Weeks and above). **Unpaid Stipend Internship** — Students gain full industry-equivalent training, live project experience, and a recognized certificate at no stipend cost. Ideal for academic credit and skill development.

Accreditations & Approvals

 ISO 9001:2015 Certified	 MSME Registered	 TN Skill Development	 AICTE Approved
---	---	--	--

02 | Program Overview & Objectives

The Internship & Employability Skill Development Program is designed to provide students with structured, industry-relevant training that complements their academic curriculum. The program equips students with domain knowledge, technical skills, soft skills, and workplace readiness — preparing them holistically for the competitive job market.

Key Benefits for Students

- ✓ Gain hands-on experience through live projects and real-world case studies
- ✓ Earn a nationally recognized Internship Completion Certificate with digital QR verification
- ✓ Develop in-demand technical and soft skills aligned with current industry hiring needs
- ✓ Build a professional resume, LinkedIn profile, and GitHub/project portfolio
- ✓ Improve aptitude, communication, and interview performance through structured drills
- ✓ Get exposure to current industry tools, technologies, and best practices
- ✓ Access placement assistance through Omega Tech's network of 100+ hiring partners
- ✓ Receive mentorship from experienced industry professionals and domain specialists
- ✓ Develop corporate etiquette, grooming, and professional communication skills
- ✓ Receive individual Skill Assessment Reports tracking domain, aptitude, and career readiness

03 | Learning Outcomes

Technical Skills	Soft Skills	Career Readiness
• Domain-specific tools & technologies	• Professional communication & presentation	• Industry-ready resume & portfolio
• Coding / Design / Analysis skills	• Team collaboration & leadership	• Mock interview confidence
• Project management fundamentals	• Critical thinking & problem solving	• Aptitude & logical reasoning mastery
• Live project execution & documentation	• Corporate etiquette & workplace grooming	• Placement referral & job portal access
• Industry software & platform proficiency	• Emotional intelligence & self-awareness	• LinkedIn & digital professional presence
• Data analysis & visualization basics	• Persuasion, negotiation & debate skills	• Career path planning & goal mapping

04 | Engineering Stream Courses

All engineering stream programs follow a four-pillar structure: Core, Trending, Advanced, and Employability. Programs are customized to match the university syllabus and student skill levels of each institution.

● Core

● Trending

● Advanced

● Employability

A. ECE – Electronics & Communication Engineering

Category	Course Name	Key Topics Covered
Core	VLSI Design	RTL coding, synthesis, timing analysis, Xilinx/Cadence tools
Core	Embedded Systems	ARM Cortex, RTOS, sensor interfacing, firmware development
Core	IoT Fundamentals	IoT architecture, MQTT, ESP32, cloud connectivity, smart systems

Category	Course Name	Key Topics Covered
Core	PCB Design	Schematic capture, layout design, DRC/ERC checks, gerber files
Core	Microcontrollers & ARM	8051, PIC, ARM architecture, interrupts, timers, communication protocols
Core	Signal & Systems	Fourier/Laplace transforms, filtering, modulation, signal analysis
Trending	MATLAB / Simulink	Signal processing, control systems simulation, Simulink block models
Trending	Raspberry Pi Projects	GPIO programming, camera module, networking, Python on Pi
Trending	5G Technology Overview	5G NR, network slicing, mmWave, beamforming, use cases
Trending	Wireless Communication	OFDM, MIMO, LTE, spectrum management, antenna design
Trending	Edge Computing	Edge AI deployment, latency reduction, fog computing architecture
Trending	Drone Technology Basics	UAV design, flight controllers, autopilot, communication links
Advanced	FPGA Programming	VHDL/Verilog, synthesis, implementation, timing constraints
Advanced	Signal Processing with Python	NumPy/SciPy, FFT, filter design, audio/image signal processing
Advanced	AI for Edge Devices	TinyML, model optimization, TensorFlow Lite, embedded inference
Advanced	RF Circuit Design	S-parameters, Smith chart, LNA, PA, RF PCB design
Advanced	Robotics & Automation	Kinematics, ROS basics, actuators, sensor fusion, path planning
Employ.	Core ECE Interview Prep	Technical MCQs, circuit problems, HR rounds, placement test patterns
Employ.	Resume & LinkedIn Profile	ECE-specific resume, project highlights, profile optimization
Employ.	Aptitude & Reasoning	Quantitative aptitude, logical reasoning, verbal ability for campus drives

B. EEE – Electrical & Electronics Engineering

Category	Course Name	Key Topics Covered
Core	Power Systems Analysis	Load flow, fault analysis, protection relays, power quality
Core	Electrical Machines	DC motors/generators, induction motors, transformers, drives
Core	Control Systems	PID controllers, Bode plots, state space analysis, stability
Core	PLC & SCADA	Ladder logic, HMI programming, SCADA design, industrial protocols
Core	Electrical Estimation	Load calculation, wiring diagrams, estimation standards, costing
Trending	Solar Energy Systems	PV design, inverter selection, net metering, solar simulation tools
Trending	EV Technology	Battery management systems, motor controllers, charging infrastructure
Trending	Smart Grid	AMI, demand response, grid automation, cybersecurity in energy
Trending	Automation with Arduino	PLC simulation, motor control, sensor interfacing, automation projects
Trending	Energy Auditing	Energy audit methodology, BEE standards, energy efficiency measures
Advanced	Power Electronics with MATLAB	Converters, inverters, PWM techniques, power factor correction
Advanced	Industrial Automation	PROFIBUS, PROFINET, servo drives, motion control systems
Advanced	Renewable Energy Design	Wind, solar, hydro integration, grid interconnection, hybrid systems
Employ.	Core EEE Interview Prep	Electrical theory questions, numerical problems, PSU exam patterns
Employ.	Resume & Career Planning	EEE resume structure, GATE awareness, govt. sector preparation

C. CSE – Computer Science Engineering

Category	Course Name	Key Topics Covered
Core	Java / Python Full Stack	OOP, Spring Boot / Django, REST APIs, MVC architecture
Core	Data Structures & Algorithms	Arrays, trees, graphs, sorting, searching, complexity analysis
Core	Database Management (SQL)	ER design, normalization, SQL queries, stored procedures, triggers
Core	Operating Systems	Process management, memory management, file systems, scheduling
Core	Computer Networks	TCP/IP, OSI model, routing protocols, subnetting, network security
Core	Software Engineering	SDLC models, Agile/Scrum, UML, testing methodologies, version control
Trending	Web Development (MERN/Django)	React, Node.js, MongoDB, Django REST, deployment on cloud
Trending	Cloud Computing (AWS/Azure)	EC2, S3, Lambda, Azure VMs, cloud deployment, cost optimization
Trending	DevOps Fundamentals	Docker, Kubernetes, CI/CD pipelines, Jenkins, GitHub Actions
Trending	Cybersecurity Basics	Network security, ethical hacking intro, OWASP Top 10, firewalls
Trending	API Development	RESTful & GraphQL APIs, Swagger, Postman testing, API security
Trending	Mobile App Development	Flutter/React Native, UI/UX for mobile, app deployment
Advanced	Machine Learning & AI	Supervised/unsupervised learning, scikit-learn, model evaluation
Advanced	Deep Learning with TensorFlow	CNN, RNN, LSTM, transfer learning, image/text classification
Advanced	Blockchain Development	Solidity, smart contracts, Ethereum, DApp development
Advanced	Kubernetes & Docker	Container orchestration, Helm charts, service mesh, monitoring
Advanced	Big Data Analytics	Hadoop, Spark, Hive, data pipelines, distributed processing
Advanced	Natural Language Processing	Text preprocessing, BERT, transformers, sentiment analysis
Employ.	Coding Interview Prep	LeetCode patterns, system design, FAANG interview techniques
Employ.	Resume & GitHub Profile	Developer resume, open-source contributions, portfolio projects

D. IT – Information Technology

Category	Course Name	Key Topics Covered
Core	Web Technologies (HTML/CSS/JS)	Responsive design, Bootstrap, JavaScript DOM, web standards
Core	Python Programming	Core Python, OOP, file handling, libraries, scripting
Core	Networking Fundamentals	Network topologies, protocols, IP addressing, troubleshooting
Core	Linux Administration	Linux commands, shell scripting, user management, services
Core	Database Administration	MySQL, PostgreSQL, backup/recovery, query optimization
Trending	Cloud Infrastructure (AWS/GCP)	Cloud architecture, IaaS/PaaS/SaaS, serverless, auto-scaling
Trending	Ethical Hacking & Cybersecurity	Penetration testing, vulnerability assessment, Kali Linux tools
Trending	Full Stack Development	MERN stack, authentication, deployment, performance optimization
Trending	Business Intelligence & Power BI	Dashboard design, DAX, data modelling, report publishing
Trending	UI/UX Design (Figma)	Wireframing, prototyping, design systems, usability testing
Advanced	Cloud Architecture Design	Multi-tier architecture, disaster recovery, high availability
Advanced	Security Operations (SOC)	SIEM tools, incident response, threat hunting, log analysis
Advanced	Data Science with Python	Pandas, Matplotlib, feature engineering, ML pipelines
Employ.	Technical Interview Prep	IT MCQs, coding rounds, aptitude, HR rounds for IT companies

Category	Course Name	Key Topics Covered
Employ.	Resume & Portfolio Building	IT-focused resume, portfolio website, GitHub showcase

E. Mechanical Engineering

Category	Course Name	Key Topics Covered
Core	AutoCAD 2D & 3D	2D drafting, 3D modelling, dimensioning, drawing standards
Core	SolidWorks / CATIA	Part modelling, assembly design, simulation, sheet metal
Core	Engineering Drawing	Orthographic, isometric views, GD&T, tolerance analysis
Core	Manufacturing Processes	Casting, welding, machining, forming, quality control
Core	Thermodynamics Applications	IC engines, heat exchangers, refrigeration, thermodynamic cycles
Trending	3D Printing & Additive Manufacturing	FDM, SLA processes, slicing software, material selection
Trending	Industrial Automation & Robotics	PLCs, pneumatics, robotic arm programming, Industry 4.0
Trending	Lean Manufacturing / Six Sigma	5S, Kaizen, DMAIC methodology, waste reduction
Trending	ANSYS / FEA Simulation	Static analysis, thermal analysis, mesh generation, result interpretation
Advanced	Product Design Engineering	DFM/DFA, concept design, prototyping, design validation
Advanced	CNC Programming	G-code/M-code, CNC turning/milling, CAM software, toolpath optimization
Advanced	Industry 4.0 & Smart Manufacturing	IoT in manufacturing, digital twin, predictive maintenance
Employ.	Core Mechanical Interview Prep	Technical MCQs, design problems, PSU exam patterns, HR rounds
Employ.	Resume & Career Planning	Mech resume, GATE awareness, core company preparation strategy

F. Civil Engineering

Category	Course Name	Key Topics Covered
Core	AutoCAD for Civil	Site plans, structural drawings, contour mapping, layout drawings
Core	STAAD Pro Structural Analysis	Beam/column design, load combinations, structural reports
Core	Construction Management	Project planning, resource allocation, MS Project, cost control
Core	Quantity Surveying & Estimation	BOQ preparation, rate analysis, estimation formats, costing
Core	Surveying Techniques	Total station, GPS surveying, levelling, traverse survey
Trending	Building Information Modeling (BIM)	Revit architecture, BIM coordination, clash detection, LOD
Trending	Green Building & Sustainability	LEED/GRIHA rating, sustainable materials, energy efficiency
Trending	GIS & Remote Sensing	ArcGIS/QGIS, spatial data analysis, land use mapping
Trending	REVIT Architecture	Floor plans, sections, elevations, rendering, family creation
Advanced	Advanced Structural Design	RCC/steel design, IS code references, seismic design principles
Advanced	Smart Infrastructure Planning	Smart city concepts, traffic management, utility mapping
Advanced	Project Management (PMP Awareness)	PMBOK framework, risk management, earned value analysis
Employ.	Govt. & PSU Exam Preparation	TNPSC/AE exam patterns, civil engineering MCQs, current standards
Employ.	Resume & Portfolio	Site visit documentation, project portfolio, civil resume writing

G. Artificial Intelligence & Data Science

Category	Course Name	Key Topics Covered
Core	Python for AI/DS	NumPy, Pandas, Matplotlib, data wrangling, EDA techniques
Core	Statistics & Probability	Descriptive statistics, probability distributions, hypothesis testing
Core	Machine Learning Fundamentals	Regression, classification, clustering, model evaluation, cross-validation
Core	Data Visualization	Matplotlib, Seaborn, Tableau, Power BI, storytelling with data
Core	Database for Data Science	SQL queries, NoSQL basics, data warehousing concepts
Trending	Deep Learning	Neural networks, CNN, RNN, LSTM, Keras/TensorFlow
Trending	Natural Language Processing	Tokenization, sentiment analysis, named entity recognition, BERT
Trending	Computer Vision	Image classification, object detection, YOLO, OpenCV
Trending	MLOps & Model Deployment	Flask/FastAPI, Docker, MLflow, model versioning, CI/CD for ML
Trending	Generative AI & LLMs	Prompt engineering, fine-tuning, RAG, LangChain, AI applications
Advanced	Reinforcement Learning	MDP, Q-learning, policy gradient, OpenAI Gym
Advanced	Big Data & Spark	Hadoop ecosystem, PySpark, distributed ML, streaming data
Advanced	Time Series Analysis	ARIMA, SARIMA, Prophet, anomaly detection, forecasting
Employ.	Data Science Interview Prep	Case studies, SQL tests, ML theory, take-home assignments
Employ.	Resume & Kaggle Portfolio	Data science resume, Kaggle profile, GitHub notebooks

H. Biomedical Engineering

Category	Course Name	Key Topics Covered
Core	Medical Instrumentation	ECG, EEG, EMG, patient monitoring systems, signal acquisition
Core	Biomechanics	Human gait analysis, prosthetics, implant design, tissue mechanics
Core	Medical Imaging	X-ray, MRI, CT, ultrasound principles, DICOM standards
Core	Biosensors & Wearables	Glucose sensors, pulse oximeters, wearable health tech, IoT health
Trending	AI in Healthcare	Medical image analysis, disease prediction, clinical NLP, CDSS
Trending	Telemedicine & Digital Health	EHR systems, telehealth platforms, patient data security, HL7/FHIR
Trending	3D Bioprinting	Bioink materials, organ printing, scaffold design, regenerative medicine
Advanced	Medical Device Regulation	FDA/CE marking process, ISO 13485, clinical trials, regulatory submissions
Advanced	Rehabilitation Engineering	Assistive technology, prosthetic limb control, neurological rehabilitation
Employ.	Biomedical Interview Prep	Technical theory, hospital equipment knowledge, research aptitude
Employ.	Resume for Healthcare/Research	Biomedical resume, research internship applications, profile building

05 | Arts & Science Stream Courses

Our Arts & Science stream programs are crafted to provide students from non-engineering disciplines with digital, analytical, and professional skills that directly enhance their employability in today's knowledge-driven economy.

● Core

● Trending

● Advanced

● Employability

A. English

Category	Course Name	Key Topics Covered
Core	Business English & Writing	Formal & informal writing, email drafting, report writing, business vocabulary
Core	Public Speaking & Presentation	Speech structure, stage confidence, voice modulation, audience engagement
Core	Content Writing Fundamentals	Blog writing, article structure, headline writing, content planning
Core	Communication Skills	Verbal & non-verbal communication, active listening, clarity of expression
Core	Proofreading & Editing	Grammar correction, style editing, fact-checking, editorial standards
Core	English Phonetics & Pronunciation	IPA basics, accent neutralisation, stress & intonation, spoken fluency
Trending	Digital Content Creation	Blog, reel scripts, social captions, content calendars, platform-specific writing
Trending	Social Media Management	Instagram/LinkedIn/Facebook strategy, scheduling tools, analytics basics
Trending	SEO Content Writing	Keyword research, on-page SEO, meta descriptions, SEO blogs & web copy
Trending	Corporate Copywriting	Ad copy, taglines, brand voice, promotional content, product descriptions
Trending	English for Media	News writing, press releases, broadcast scripts, media ethics
Trending	Script & Video Content Writing	YouTube scripts, explainer videos, podcast scripts, short-form storytelling
Trending	Translation & Localization	Tamil-English translation, localization basics, subtitling, cultural nuances
Advanced	Technical Writing & Documentation	User manuals, SOPs, API documentation, white papers, process guides
Advanced	Scriptwriting & Storytelling	Narrative structure, character arcs, screenplay format, brand storytelling
Advanced	Brand Communication Strategy	Brand tone & voice, messaging frameworks, crisis communication, PR basics
Advanced	UX Writing	Microcopy, UI text, error messages, onboarding content, user-centric language
Advanced	E-Learning Content Development	Instructional design basics, LMS content, module scripting, assessment writing
Advanced	Grant & Research Writing	Proposal writing, abstract crafting, literature review, research documentation
Employ.	Resume & Cover Letter Writing	ATS-friendly resume, cover letter formats, professional summary, LinkedIn bio
Employ.	Interview Communication	HR interview prep, STAR method, body language, telephonic & video interviews
Employ.	Aptitude — Verbal Section	Synonyms/antonyms, reading comprehension, fill-in-the-blanks, para jumbles

B. Commerce

Category	Course Name	Key Topics Covered
Core	Tally Prime & GST	Voucher entry, GST returns, ledger management, MIS reports
Core	Financial Accounting	Double entry system, trial balance, P&L, balance sheet preparation
Core	Banking Fundamentals	Banking operations, NPA, RBI guidelines, financial products
Core	Business Law Basics	Contract act, sale of goods, partnership, consumer protection
Core	MS Office for Business	Excel formulas, PowerPoint presentations, Word documents, Outlook
Trending	Digital Marketing	SEO, SEM, social media ads, email marketing, analytics
Trending	E-Commerce Management	Shopify, Amazon/Flipkart seller setup, marketplace strategies
Trending	Financial Modelling (Excel)	Discounted cash flow, scenario analysis, valuation models
Trending	Zoho Books / QuickBooks	Cloud accounting, invoicing, payroll, tax compliance
Trending	Business Analytics	Data-driven decision making, Excel/Power BI, KPI dashboards
Advanced	Advanced Financial Analysis	Ratio analysis, investment appraisal, risk assessment, portfolio basics
Advanced	SAP FICO Basics	SAP navigation, financial accounting module, controlling basics
Advanced	Entrepreneurship & Start-Up Finance	Business plan, funding sources, pitch deck, startup financial planning
Employ.	Resume Building	Commerce resume, internship applications, professional summary
Employ.	Bank / NBFC Interview Prep	Banking aptitude, group discussion, personal interview techniques

C. Computer Science (B.Sc. CS)

Category	Course Name	Key Topics Covered
Core	Python Programming	Core Python, OOP, file handling, modules, error handling
Core	Web Development (HTML/CSS/JS)	Responsive design, Bootstrap, JavaScript DOM manipulation
Core	Database Management (MySQL)	SQL queries, table design, joins, transactions, stored procedures
Core	C & C++ Programming	Pointers, data structures, OOP in C++, memory management
Core	Data Structures	Arrays, linked lists, stacks, queues, trees, graphs, hashing
Trending	Full Stack Web Development	React.js, Node.js, MongoDB, REST APIs, deployment
Trending	Data Analytics with Python	Pandas, Matplotlib, data cleaning, exploratory data analysis
Trending	Cloud Computing Basics	AWS/GCP fundamentals, cloud storage, virtual machines, serverless
Trending	Mobile App Development	Flutter basics, Android development, app publishing
Trending	Cybersecurity Fundamentals	Network security, password hygiene, encryption basics, ethical hacking intro
Advanced	Machine Learning with Python	Scikit-learn, feature engineering, model selection, evaluation metrics
Advanced	Data Science Projects	End-to-end ML pipeline, Kaggle datasets, project documentation
Advanced	React.js / Node.js	Component-based UI, hooks, state management, backend REST APIs
Advanced	AI Application Development	Building AI-powered apps, API integration, chatbots, automation
Employ.	Coding Interview Practice	DSA problems, online judge practice, mock coding tests
Employ.	Resume & GitHub Portfolio	Developer resume, GitHub repos, README documentation

D. Information Technology (B.Sc. IT)

Category	Course Name	Key Topics Covered
Core	Networking (CCNA Basics)	OSI/TCP-IP model, subnetting, routing, switching, VLANs
Core	Linux & Shell Scripting	Linux commands, bash scripting, cron jobs, system administration
Core	Python / Java Programming	Core programming, OOP, libraries, automation scripting
Core	Web Design	HTML5, CSS3, JavaScript, responsive layouts, web standards
Core	Database Administration	MySQL/PostgreSQL, backup, performance tuning, query optimization
Trending	Cloud Platforms (AWS/Azure)	Cloud services, storage, networking, serverless functions
Trending	Ethical Hacking Basics	Reconnaissance, scanning, exploitation basics, Kali Linux tools
Trending	UI/UX Design (Figma)	Wireframing, prototyping, user research, design systems
Trending	Power BI & Data Visualization	Dashboard design, data connections, DAX formulas, publishing
Advanced	Cloud Solutions Architecture	High availability, disaster recovery, cost optimization, cloud security
Advanced	Penetration Testing	Web app testing, network pen testing, vulnerability reporting
Advanced	Advanced Data Analytics	Statistical analysis, machine learning basics, predictive modelling
Employ.	Technical Interview Prep	IT aptitude, coding tests, networking MCQs, HR interview
Employ.	Resume & LinkedIn	IT resume structure, LinkedIn optimization, online presence

E. Physics

Category	Course Name	Key Topics Covered
Core	MATLAB for Physics	MATLAB programming, matrix operations, plotting, simulations
Core	Scientific Computing with Python	SciPy, NumPy, symbolic math, data analysis for physics
Core	Optics & Photonics Basics	Wave optics, laser fundamentals, fiber optics, photonic devices
Core	Electronics Lab Skills	Oscilloscope, multimeter, circuit testing, breadboard prototyping
Core	Measurement & Instrumentation	Sensors, transducers, calibration, data acquisition systems
Trending	Nanotechnology Awareness	Nanomaterials, synthesis methods, characterization techniques, applications
Trending	Quantum Computing Introduction	Qubits, quantum gates, Qiskit, quantum algorithms basics
Trending	Renewable Energy Technology	Solar cell physics, wind energy, energy storage, efficiency
Advanced	Computational Physics	Numerical methods, Monte Carlo simulations, differential equations
Advanced	Photovoltaic System Design	PV modelling, MPPT, energy yield analysis, system sizing
Employ.	Research Resume Building	Academic CV, research statement, GATE/CSIR awareness
Employ.	Science Communication	Scientific writing, presenting research, journal paper structure

F. Mathematics

Category	Course Name	Key Topics Covered
Core	Statistical Analysis (SPSS/Excel)	Descriptive & inferential statistics, hypothesis testing, ANOVA
Core	R Programming	R basics, ggplot2, statistical tests, data manipulation with dplyr
Core	Data Analysis Fundamentals	Data types, data cleaning, EDA, correlation & regression
Core	Quantitative Methods	Operations research, linear programming, optimization, simulation
Trending	Data Science with Python	Python for data analysis, ML basics, visualisation, model building

Category	Course Name	Key Topics Covered
Trending	Business Analytics	KPIs, business metrics, Excel analytics, dashboards
Trending	Financial Mathematics	Interest theory, derivatives, risk modelling, actuarial basics
Trending	Machine Learning Concepts	Supervised/unsupervised algorithms, validation, applied ML
Advanced	Advanced Machine Learning	Ensemble methods, boosting, neural networks, hyperparameter tuning
Advanced	AI for Predictive Modelling	Time series forecasting, regression models, AI applications in finance
Advanced	Data Visualization with Tableau	Dashboard design, Tableau calculations, storytelling, published views
Employ.	Aptitude & Quant Mastery	Quantitative aptitude, number theory, permutations, data interpretation
Employ.	Resume for Analytics Roles	Analytics resume, projects section, tools proficiency showcase

G. Electronics (B.Sc. Electronics)

Category	Course Name	Key Topics Covered
Core	Circuit Design & Simulation (Proteus)	Analog/digital circuits, Proteus simulation, circuit debugging
Core	Embedded Systems Basics	Arduino, microcontroller programming, sensors, actuators
Core	PCB Layout Design	KiCad/EasyEDA, schematic capture, PCB routing, fabrication
Core	Microcontroller Programming	8051, Arduino, AVR, timers, UART, SPI, I2C protocols
Core	Sensors & Transducers	Temperature, pressure, light, proximity sensors, signal conditioning
Trending	IoT System Design	IoT platforms, MQTT, AWS IoT, data visualization, smart devices
Trending	Arduino & Raspberry Pi	Hardware projects, Python on Pi, GPIO, IoT integration
Trending	Wearable Technology	Flex sensors, biometric sensors, wearable PCB design, BLE
Advanced	VLSI Design Basics	CMOS circuits, logic synthesis, standard cell design flow
Advanced	Edge AI & TinyML	Model deployment on microcontrollers, TensorFlow Lite, audio/vision
Employ.	Core Electronics Interview Prep	Electronic theory, circuit analysis, technical MCQs, HR rounds
Employ.	Resume & Project Portfolio	Electronics resume, project documentation, portfolio presentation

H. Marine Biology

Category	Course Name	Key Topics Covered
Core	Marine Ecosystem Management	Coral reef ecology, mangrove systems, marine food webs, conservation
Core	Aquaculture Techniques	Fish farming, shrimp culture, water quality management, disease control
Core	Fish Taxonomy & Identification	Classification systems, morphological keys, fish diversity surveys
Core	Water Quality Monitoring	Physical/chemical/biological parameters, sampling, lab analysis
Trending	Ocean Data Analytics (GIS)	ArcGIS for marine, spatial data, habitat mapping, oceanographic data
Trending	Sustainable Fisheries Management	Stock assessment, fishing regulations, certification schemes
Trending	Blue Economy Concepts	Ocean-based industries, maritime policy, sustainable ocean use
Advanced	Remote Sensing for Marine Research	Satellite imagery, NDVI/NDWI, ocean colour analysis
Advanced	Marine Biotechnology	Bioprospecting, marine-derived compounds, biotech applications
Employ.	Research Resume Building	Academic CV for marine sciences, fellowship applications
Employ.	Govt. Exam Awareness (TNPSC/IFS)	Syllabus overview, exam patterns, preparation strategy

I. Economics

Category	Course Name	Key Topics Covered
Core	Economic Data Analysis (Excel)	Data collection, tabulation, charts, economic indicator analysis
Core	Macro & Microeconomics Applications	Market structures, GDP analysis, fiscal/monetary policy, trade
Core	Statistics for Economists	Regression, correlation, time series, index numbers
Core	Financial Markets Overview	Stock markets, bonds, derivatives, mutual funds, RBI policies
Trending	Econometrics with R/STATA	OLS regression, panel data, instrumental variables, heteroskedasticity
Trending	Digital Economy & Fintech	Cryptocurrency, digital payments, fintech regulation, open banking
Trending	Business Forecasting	Demand forecasting, moving averages, exponential smoothing, ARIMA
Advanced	Advanced Econometrics	Cointegration, VAR models, probit/logit, difference-in-differences
Advanced	Behavioural Economics	Cognitive biases, nudge theory, experimental economics, policy design
Employ.	Resume for Economics / Finance Roles	Economics resume, internship cover letters, analytical skills showcase
Employ.	Banking Sector Interview Prep	Banking GK, aptitude, group discussion, RBI/SEBI policy awareness

J. Psychology

Category	Course Name	Key Topics Covered
Core	Research Methods in Psychology	Experimental design, surveys, case studies, ethical guidelines
Core	Psychological Assessment Basics	Intelligence tests, personality inventories, assessment interpretation
Core	Counselling Skills Fundamentals	Active listening, empathy, rapport building, basic counselling techniques
Core	Human Resource Psychology	Recruitment psychology, motivation theories, organizational behaviour
Trending	Organizational Behaviour	Team dynamics, leadership styles, workplace motivation, change management
Trending	Child & Adolescent Psychology	Developmental stages, learning difficulties, school counselling
Trending	Positive Psychology & Wellbeing	PERMA model, resilience building, mindfulness, strength-based approaches
Advanced	Industrial-Organizational Psychology	Competency mapping, talent assessment, performance psychology
Advanced	Cognitive Behavioural Techniques	CBT basics, cognitive restructuring, behavioural activation, journaling
Employ.	Resume for HR / Counselling Roles	Psychology resume, internship applications, portfolio of case reports
Employ.	Interview Prep for Behavioural Rounds	Competency-based interviews, STAR method, personality profiling awareness

K. Journalism & Mass Communication

Category	Course Name	Key Topics Covered
Core	News Writing & Reporting	News gathering, inverted pyramid, beat reporting, source verification
Core	Print & Digital Journalism	Feature writing, editorial, column writing, online news platforms
Core	Photography & Visual Journalism	Composition, DSLR basics, photo editing, photojournalism ethics
Core	Radio & Podcast Production	Scripting, voice training, audio editing, podcast publishing
Trending	Digital Media & Social Journalism	Social media reporting, data journalism, live streaming, viral content
Trending	Video Journalism & Reels	Mobile journalism, video editing (Premiere/CapCut), storytelling formats

Category	Course Name	Key Topics Covered
Trending	Public Relations & Corporate Communication	Press releases, media relations, crisis PR, brand communication
Advanced	Documentary Filmmaking	Pre-production, scripting, cinematography, editing, festival submission
Advanced	Data Journalism	Infographic creation, FOIA/RTI requests, data storytelling, visualization
Employ.	Resume for Media Roles	Journalism resume, portfolio website, published works showcase
Employ.	Media Interview Preparation	On-camera presence, voice modulation, editorial interview techniques

06 | Employability Skill Modules (Common for All Streams)

The following modules are embedded in all internship programs regardless of stream. These ensure every student develops the professional edge required by employers across all sectors.

S.No	Module	Key Topics Covered
01	Communication Skills	Workplace communication, email writing, formal vs informal English, listening skills, telephone & video call etiquette
02	Resume & LinkedIn Building	Crafting an ATS-friendly resume, professional summary, LinkedIn optimization, GitHub/portfolio setup
03	Interview Skills & Mock Drills	HR & technical interview techniques, STAR method, body language, common question practice, panel & video interviews
04	Aptitude & Reasoning	Quantitative aptitude, logical reasoning, verbal ability, data interpretation, time-speed-distance, number series
05	Corporate Grooming & Etiquette	Professional appearance, workplace behaviour, business card etiquette, meeting protocols, email and chat manners
06	Group Discussion & Presentation	GD topics and strategies, presentation structure, handling Q&A, persuasion and debate skills, confidence building
07	Personality Development	Self-awareness, emotional intelligence, goal setting, time management, growth mindset, stress handling
08	Career Planning & Goal Mapping	Career path exploration, industry mapping, short-term & long-term goal setting, mentorship model
09	Digital Literacy & Tools	MS Office, Google Workspace, project management tools (Trello/Notion), basic Excel for professionals
10	Industry Awareness & Trends	Sector-specific trends, company research, current industry news, emerging roles and technologies
11	Entrepreneurship & Innovation Mindset	Idea validation, lean startup concepts, design thinking, business model basics, pitching skills
12	Financial Literacy for Professionals	Personal budgeting, salary negotiation, PF/ESI basics, tax awareness, investment fundamentals

07 | Program Duration & Structure

Programs are structured in multiple duration models to suit college schedules, semester breaks, and institutional requirements. All models include both training and live project components.

Duration	Total Hours	Training Split	Project Component	Key Outcomes
2 Weeks (Short Term)	30 Hours	24 Hrs Training + 6 Hrs Project	Mini Case Study / Industry Assignment	Core skill introduction, basic certification, domain awareness
4 Weeks	60 Hours	45 Hrs Training + 15 Hrs Project	Guided Live Project (Individual)	Skill proficiency, project execution, internship certificate
6 Weeks	90 Hours	65 Hrs Training + 25 Hrs Project	Live Project with Mentor Review	Domain mastery, project report, placement module included
8 Weeks	120 Hours	85 Hrs Training + 35 Hrs Project	Team/Individual Live Project + Viva	Advanced skills, industry simulation, placement readiness
12 Weeks (Advanced)	180 Hours	120 Hrs Training + 60 Hrs Project	Full Industry Project + Presentation	Complete skill suite, placement assistance, advanced certification

08 | Delivery Modes

Omega Tech offers flexible delivery modes to accommodate varying institutional infrastructure, student availability, and geographic requirements.

Mode	Description	Tools & Platform	Best For
Offline (On-Campus)	Trainer visits the campus. Classes conducted in college labs/classrooms. Fully residential for students.	Physical lab, projector, whiteboard, printed materials	Colleges with infrastructure; practical-heavy programs
Online (Live & Recorded)	Live sessions via video conferencing. Recorded sessions available for review. Digital assignments and assessments.	Zoom/Google Meet, LMS Portal, Digital Assessment Tool	Remote students, holiday batches, multi-campus roll-out
Hybrid (Recommended)	Combination of online theory sessions and on-campus practical/project days. Best balance of flexibility and hands-on experience.	LMS + On-campus labs, Blended assignments, Google Classroom	Most college programs; optimal learning outcomes

All three modes include the same curriculum, assessment standards, and certification. Schedules are customised to fit the college academic calendar and student availability.

09 | Value Additions & Certifications

#	Value Addition	Details
01	Internship Certificate	Nationally recognized Internship Completion Certificate with program details, skills acquired, and digital verification QR code. Signed by Omega Tech Director & College Head.
02	Live Project Execution	Students work on real-world industry projects (not simulated exercises). Projects are reviewed by industry mentors and added to students' portfolios.

#	Value Addition	Details
03	Industrial Case Studies	Domain-specific case studies drawn from real industry scenarios — IT systems, manufacturing, financial analysis, marketing campaigns, marine research, etc.
04	Placement Assistance	Resume shortlisting, referral to Omega Tech's hiring partner network (100+ companies), placement portal access for 6 months post-program.
05	Guest Lectures & Webinars	Minimum 1–3 industry expert sessions per program cycle. Topics include emerging trends, career advice, and domain deep-dives by professionals from MNCs, startups, and public sector.
06	Skill Assessment Report	Individual performance assessment report for each student — domain skill score, aptitude score, communication score, and career readiness index. Shared with student and college.
07	Internship Report Guidance	Structured guidance on writing and formatting the internship report for university submission. Templates and mentor feedback included.
08	Digital Badge & LinkedIn Certificate	Digital skill badge issued via Omega Tech's certification platform. Students display certificates directly on LinkedIn and professional profiles.
09	Alumni Network Access	Students become part of Omega Tech's alumni network, receiving job alerts, webinar invites, and peer learning opportunities post-program.
10	Industry Exposure Visit	Facilitated virtual or in-person industry visits to partner companies for eligible programs, giving students direct corporate exposure.

10 | Partnership Models

Omega Tech offers multiple partnership models to accommodate the varying needs, scales, and administrative structures of different institutions. All partnerships are formalized through a signed MOU.

Model	Description	Best Suited For
Fixed Fee Model	Omega Tech charges a fixed rate per student. College collects fees independently.	Autonomous colleges with large batches (100+)
Revenue Share Model	Transparent revenue-sharing arrangement (65:35 to 75:25 split). College acts as program coordination partner.	Affiliated colleges, new partners, smaller batches
MOU / Annual Contract	Annual lump-sum contract. Omega Tech trains unlimited students per academic year.	Universities and multi-campus institutions
Sponsored Model	CSR / Government funds sponsorship. Zero cost to students.	Government colleges, tribal and rural campuses
White-Label Program	College-branded training delivered entirely by Omega Tech trainers under the institution's name.	Institutions building their own centre of excellence brand

Note: All partnership terms will be formalized through a signed Memorandum of Understanding (MOU) between Omega Tech Private Limited and the partner institution.

Why Choose Omega Tech Private Limited?

✓ Industry-Aligned Curriculum	Our courses are designed in direct consultation with HR managers, industry leaders, and placement officers. Every module reflects current hiring requirements and skill gaps identified by top employers.
--------------------------------------	---

✓ Expert Trainer Pool	All our trainers are working industry professionals with a minimum of 5 years of domain experience. They bring real-world scenarios, live tools, and current industry practices into every session.
✓ Certified, Verifiable Outcomes	Our certifications are backed by a digital verification system. Employers can verify student credentials online — adding credibility for students during recruitment.
✓ Customized to Every Institution	No two colleges are alike. We tailor our programs to your student demographics, available infrastructure, university syllabus requirements, and institutional goals.
✓ Strong Placement Network	With 100+ hiring partner companies across IT, Manufacturing, BFSI, Marketing, and Core Engineering sectors, we actively support student placement — not just certification.
✓ Transparent Partnership Model	Our revenue-sharing model is fully documented through an MOU. No hidden charges, no ambiguity. End-to-end transparency at every stage.
✓ End-to-End Program Management	From initial planning and student registration to batch scheduling, trainer deployment, assessment, and certification — Omega Tech manages everything.
✓ Continuous Support & Improvement	Post-program, we provide 6-month placement portal access, alumni networking, and continuous feedback loops to improve program quality for future batches.

11 | Contact Us

We invite you to partner with us and offer your students the industry-ready advantage they deserve. Reach out to us for a free demo session, detailed program proposal, or a campus visit.
